

Let **ControlSCAPE** put the finishing touches on your landscape lighting masterpiece...

**CONTROLSCAPE**  
Landscape Lighting Control

ControlSCAPE brings cutting edge communication technology to the beauty of your nighttime portrait. By adding ControlSCAPE to your home you'll now have complete control of your outdoor lighting in three different ways:

- Manually: Use the built-in push buttons to turn lights on or off anytime.
- Automatically, based on Time of Day: Tell ControlSCAPE the exact time every day when you would light lights to come on or go off.
- Automatically, based on Sunrise or Sunset: Allow ControlSCAPE to turn the lights of your choice on or off based on the daily sunrise and/or sunset. Don't worry, ControlSCAPE will automatically adjust for daylight savings time if need be.

**Additional Benefits:**

Always come home to a perfectly lit, inviting residence.

Guarantee that safety lights stay on all night while decorative lights turn off when you wish.

Conserve energy through precision control

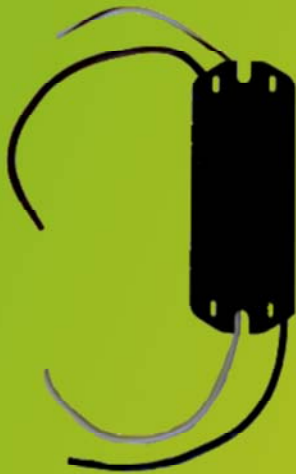

The **Plug In Relay Module** is specifically designed to control high powered loads up to 12 Amps.

---

**Dimmers** and **Switches** are used to control incandescent, florescent and magnetic low voltage loads. Available in 600 Watt to 2400 Watt versions.

---

The **Wire In Relay Module** is useful for controlling large loads where receptacles are not available.

---

**Receptacles** are ideal for replacing existing receptacles and giving you control over any switched device.

---

When you combine the ultra-reliable ControlScape Desktop Timeclock with our large array of quality accessories, you can expect nothing less than a perfect performance every night.
